

FREE OPEN-SOURCE TOOL

AI Stack Doctor

Know exactly where your AI infrastructure stands.

A plain-English guide for business leaders and decision-makers.

The Problem Every Leader Faces

AI is everywhere. But is it actually working — for you or your competitors?

No visibility

You've invested in AI tools, but have no clear picture of how healthy or current your stack actually is.

No benchmarks

How does your AI maturity compare to your competitors? Without data, it's impossible to know.

Hidden risk

Outdated models, poor governance, and compliance gaps hide in plain sight until they become problems.

What AI Stack Doctor Does

Type any company name.

Get a complete AI health report in minutes.

AI Stack Doctor researches publicly available signals — job postings, engineering blogs, vendor announcements, and industry benchmarks — then scores the company's AI infrastructure across 7 categories and compares it against 3 industry peers.

SAMPLE REPORT

Stripe Inc.

84

/100

Healthy — Scaling Stage

7 Categories. 100-Point Score.

Every audit covers the same 7 dimensions — so scores are always comparable.

/14

GenAI / LLMs

Models in use, versions, costs, latency

/14

AI Platforms

Governance, model management tools

/14

Agentic AI

Automation and orchestration frameworks

/14

MLOps / LLMOps

Monitoring, drift detection, registries

/14

Machine Learning

Training pipelines, framework currency

/16

Cloud AI Services

AWS/Azure/GCP efficiency and health

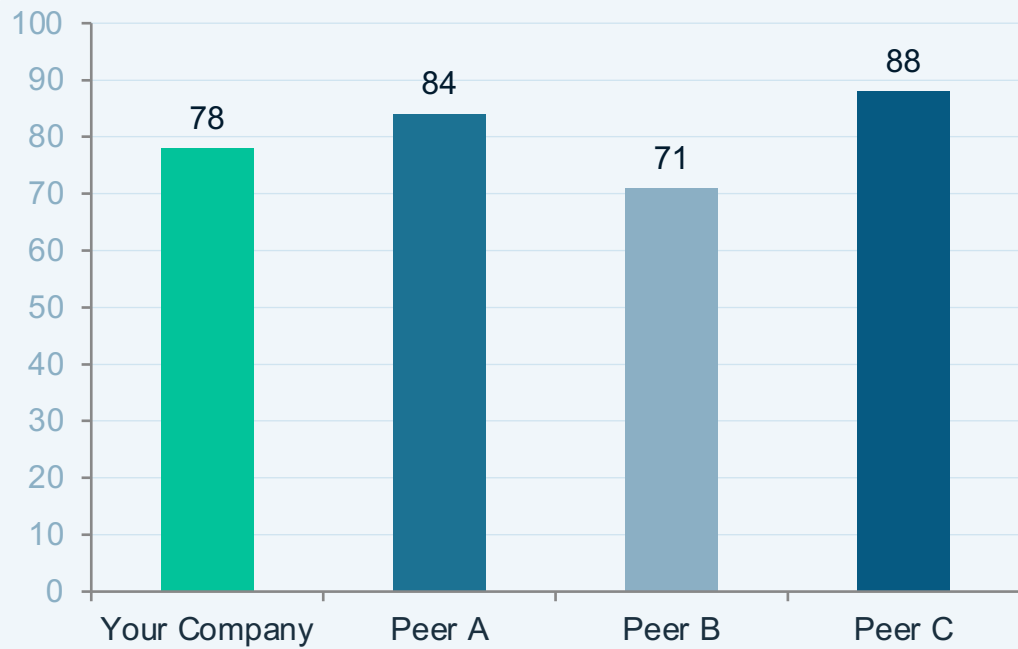

/14

Data Engineering

Data quality, pipelines, warehousing

See How You Stack Up

Every report benchmarks against 3 industry peers — automatically.

Three Ways to Use It

Self-assessment

Audit Your Own Stack

Understand your AI maturity before your board, your investors, or your customers ask. Get a prioritized list of gaps and what they're costing you.

Market research

Research Competitors

Know what AI capabilities your competitors have deployed. Identify where they're ahead and where you have an edge before making investment decisions.

Due diligence

Evaluate Acquisition Targets

Run a fast AI infrastructure assessment on any company you're considering. Surface technical debt and capability gaps before the term sheet.

Get Started in 60 Seconds

No installation required for the hosted version.

Option 1

Use the Live Web App

1. Go to ai-stack-doctor.onrender.com
2. Enter any company name
3. Click Audit
4. Read your report

Free — No Sign-up Required

Option 2

Connect to Claude Desktop

1. Install Claude Desktop
2. Clone the GitHub repo
3. Add the MCP config (README)
4. Ask Claude: "Audit Stripe"

For Developers & Power Users

What's in Every Report

Health Score /100

Color-coded overall score with per-category breakdown. Green (80+), Yellow (60–79), Red (<60).

Stack Inventory

Every AI tool confirmed in use — models, platforms, data infrastructure, and integrations.

Peer Benchmarking

Side-by-side comparison against 3 industry peers with maturity level and key differentiators.

Governance Assessment

Data privacy, compliance posture (GDPR, CCPA, EU AI Act), and security signal review.

Strategic Recommendations

Top 5–7 prioritized actions with estimated ROI, gap cost, fix cost, and payback period.

PDF Export

Download a branded, shareable report to present to stakeholders or keep on record.
