

AI STACK DOCTOR

User Guide · For Business Leaders & Decision-Makers

Know exactly where your AI infrastructure stands.

A plain-English guide — no technical background required.

Executives & Board

Consultants

Marketers & CMOs

Investors

Free · Open Source · MIT License · No Sign-up Required

ai-stack-doctor.onrender.com

github.com/dwnjuguna/AI-Stack-Doctor

The problem every leader faces.

No Visibility

You've invested in AI tools, but have no clear picture of how healthy or current your stack actually is.

No Benchmarks

How does your AI maturity compare to your competitors? Without data, it's impossible to know.

Hidden Risk

Outdated models, poor governance, and compliance gaps hide in plain sight until they become problems.

*88 of 130 marketing leaders are NOT using AI to manage their own AI stack — the highest gap of any AI use case surveyed.
Only 8% of organizations report full confidence in their AI governance readiness. — State of Martech 2026*

WHAT IT DOES

Type any company name. Get a full AI health report.

AI Stack Doctor researches publicly available signals:

- Job postings & engineering blogs
- Vendor announcements & press releases
- GitHub activity & open-source signals
- Industry benchmarks & analyst reports
- 44 pre-loaded company intelligence profiles

*...then scores the AI infrastructure across 7 categories
and compares it against 3 industry peers.*

Benchmarks drawn from 44 pre-loaded company intelligence profiles across 5 regions and 28 industries.

44 company profiles. 5 regions. 28 industries.

United States

17 companies

Google · Microsoft · NVIDIA · Meta · OpenAI · Anthropic · Netflix · Tesla · Apple · Amazon + 7 more

Europe

10 companies

Stability AI · DeepL · Synthesia · Aleph Alpha · ElevenLabs · Revolut · Adyen · Klarna + 2 more

Asia

9 companies

Baidu · ByteDance · Alibaba · Samsung · DeepSeek · Infosys · Ant Group · Paytm · Kakao

Latin America

5 companies

Nubank · Mercado Libre · Rappi · Clip · Ualá

Africa

3 companies

Flutterwave · Safaricom (M-Pesa) · Moniepoint

First AI benchmarking tool in the world with African company profiles.

Three ways to use AI Stack Doctor.

SELF-ASSESSMENT

Audit Your Own Stack

Understand your AI maturity before your board, your investors, or your customers ask. Get a prioritized list of gaps and what they're costing you — with estimated ROI for every fix.

MARKET INTELLIGENCE

Research Competitors

Know what AI capabilities your competitors have deployed. Identify where they're ahead and where you have an edge before making investment or product decisions.

DUE DILIGENCE

Evaluate Acquisition Targets

Run a fast AI infrastructure assessment on any company you're considering. Surface technical debt, capability gaps, and governance risk before the term sheet.

Start with ground truth — not guesswork.

Send clients a tailored intake form before the first call. Their answers become high-confidence input data for the audit — replacing web research with verified facts.

Consultant

~10 min · </intake/consultant>

Client engagements, gap analysis, pre-engagement discovery

C-Suite / Executive

~8 min · </intake/executive>

Board-ready reports, compliance risk, investment decisions

Marketer / CMO

~7 min · </intake/marketer>

MarTech AI stack, content AI audit, deprecated tool detection

General

~5 min · </intake/general>

Quick self-assessment, first-time users

Intake data = high-confidence ground truth. The agent uses it as primary source over web research.

What's in every report.

Health Score /100

Color-coded overall score with per-category breakdown. Green (80+), Yellow (60–79), Red (<60).

Stack Inventory

Every AI tool confirmed in use — models, platforms, data infrastructure, and integrations.

Deprecation Risk Flags

Tools at high risk of absorption by ChatGPT, Claude, or Gemini — powered by State of Martech 2026 data.

Peer Benchmarking

Side-by-side comparison against 3 industry peers with maturity level and key differentiators.

AI Org Health

CAIO signals, AI platform team maturity, and production depth — new in v4.

Governance Assessment

Data privacy, compliance posture (GDPR, CCPA, EU AI Act), and security signal review across 14 frameworks.

Strategic Recommendations + ROI

Top 5–7 prioritized actions with gap cost, fix cost, projected ROI, and payback period.

PDF Export

Download a shareable report to present to stakeholders or keep on record.

Try it now — it's free.

No sign-up. No installation. Just type a company name and go.

01 Use the Live Web App

1. Go to ai-stack-doctor.onrender.com
2. Enter any company name
3. Click Audit
4. Read your report

Free — No Sign-up Required

02 Connect to Claude Desktop

1. Install Claude Desktop
2. Clone the GitHub repo
3. Add the MCP config (see README)
4. Ask Claude: "Audit Stripe's AI stack"

For Developers & Power Users

03 Send an Intake Form First

1. Share your persona link with a client
2. They complete the form (~5–10 min)
3. Download their intake JSON
4. Run: `python3 intake_reader.py`

For Consultants & Advisors
